

Student Spotlight

My name is Delores. I have some basic computer experience. After hearing about the ASC3 Senior Computer Classes from a good neighbor friend of mine it was a good time to update my skills.

I have always been interested in technology this class has made me want to know and understand today's technology more.

The ASC3 training classes has helped me to feel more comfortable with the new technology. It also helps with social skills being around other seniors eager to learn.

Today's technology can be overwhelming but the past of this class is good the instructor makes sure you understand the whys and what not to do to keep us safe from scams.

I would defiantly recommend this class to other seniors. I plan to continue with my technology education.
